

# EP50

The future of high performance  
**competition karting** is here.

MeSwel proudly announces the EP50  
electric drive system. The drop-in system  
comes as a **complete** power pack for your kart.  
It fits all standard chassis and does not require  
any special bodywork.

By applying the latest electric motor and battery  
technology, the EP50 enables racing without  
compromising performance. **Regenerative braking**  
is used for optimal efficiency. The power system is  
**future proof** and scalable, allowing it to be adjusted  
to different power settings and racing classes.

The EP50 power system is **quiet**, has **zero emission**  
and requires **no maintenance!**
