

The future of high performance
competition karting is here.

MeSwel proudly announces the EP6
electric drive system. The drop-in system
comes as a **complete** power pack for your kart.
It fits all standard mini chassis and does not
require any special bodywork.

By applying the latest electric motor and battery
technology, the EP6 enables racing without
compromising performance. **Regenerative braking**
is used for optimal efficiency. The power system is
future proof and scalable, allowing it to be adjusted
to different power settings and racing classes.

The EP6 power system is **quiet**, has **zero emission**
and requires **no maintenance!**
